

Energy Sparks for schools

A unique school-specific energy management tool and energy education programme

Save up to 40% off school energy bills

Cut your carbon footprint

Give pupils the knowledge and skills to cut energy waste at school

Learn why 800 schools and counting are using Energy Sparks...

With Energy Sparks you can:

Save money

Follow our school-specific low and no-cost recommendations to reduce primary school energy bills by an average of £3,000. Secondary schools save an average of £12,000.

Find out how Northampton Academy used Energy Sparks to change their boiler controls to save 40% off their gas bill and **£34,000**

Take control

Receive analysis of your school's gas and electricity use, action prompts, and energy-saving priorities via pupil and staff dashboards and weekly alert emails.

Benchmark school energy use against other similar schools around the country using our dashboards.

"I think Energy Sparks is amazing. It just makes complete sense of the overwhelming half-hour meter readings data, which means nothing on an energy bill.... In only a few weeks we have made significant changes which will in turn reduce our carbon emissions and assist in cost savings for the school. With the pupil dashboard we can also help to educate the next generation to be more considerate of our impact on the environment. As part of a generation who has caused such a devastating impact on our planet, it is the very least we can do."

Emma Oxtoby, Business Manager, Sunnyfield Primary School, Doncaster

Energy Sparks is a registered charity in England and Wales, registration 1189273.

"No one can take action towards net zero without data and Energy Sparks provides the data. It also provides this in a pupil accessible way that enables sustainability to be integrated into the curriculum. The best chance of fighting the climate crisis is by empowering the next generation and that's what Energy Sparks does."
The HEART Education Trust

Empower pupils

Access over 140 downloadable education resources to develop pupil understanding of energy use and its impact
Record activities to participate in our competitions and win prizes

Read about how Damers First School cut their electricity consumption by 12% and involved pupils in energy audits, holiday switch off campaigns, cutting energy waste in the school kitchens and presenting the energy saving message to the local community

Cut carbon emissions

Use recommendations to help develop a climate action plan to reduce carbon emissions.
Set targets to reduce energy usage.

Every school is provided with a publicly available energy management tool including:

- separate adult and pupil dashboards, tailored for each audience
- school-specific energy analysis and prioritised recommendations
- interactive energy usage charts
- weekly emailed energy use alerts
- ability to set energy saving targets and track progress
- benchmarking of energy use against similar schools
- unlimited user accounts
- webinar training
- email support with energy management and sustainability education
- access to >140 pupil activities with downloadable lesson plans, workshops and additional resources
- guidance on >60 adult led low and no-cost energy efficiency actions
- analysis of up to 10 gas and electricity meters
- integrated solar data (if relevant)
- support with upgrading meters to half-hourly metering (if needed)
